

EcoBoard

A biodegradable signage alternative to traditional corflute.

01 PRODUCT USAGE

EcoBoard is a biodegradable, organic and chemical-free alternative to traditional corflute and plastic products.

- Retail (such as sales signs, parking signs and staff signage)
- Government (including election campaigns)
- Real estate advertisements
- Construction industries (including excavation and demolition)
- Councils (such as safety signs, security signs and community information message signs)
- Events and festivals (including gate signs, trade stalls, amenities)

02 PRODUCT BENEFITS

It is very simply a wood pulp core with a high-quality paper lining. We recommend it for its stable core, dual side printability and smooth printing.

Transparency

Due to its biodegradable nature, it's not quite as durable as traditional corflute. But it's still a great short-term material for outdoor signage solutions and projects. It can last up to twelve months for indoor applications.
